

ANGLER'S TOTE

8 ROD CAPACITY

DECK MOUNTING INSTRUCTIONS

- Select a desirable place on the boat deck for a vertical rod rack.
- Position the rod rack and place the two deck mounting rails in position shown.
- Mark and drill two pilot holes for each deck mounting rail.
- Attach deck mounting rails to boat deck. Allow a small clearance between the deck rails and the rack base for easy positioning and removal.
- Secure rack base to deck mounting rails with hitch pin as shown.

ANGLER'S TOTE XL

6 ROD CAPACITY

*** DETAILS ***

Angler's Tote and **Angler's Tote XL** are versatile, multi-use products for the fisherman. Both are rugged, compact designs that are ideal on-board rod racks for many fishing boats. Each model loads and unloads quickly. The eight rod model uses upper and lower clips to hold light tackle rods in place. The six rod model, designed to handle larger combos, uses upper and lower brackets. The clips and brackets are adjustable up and down on the frame for perfect control. Ultra-light crappie rigs up to two piece surf rods can be carried. The rods are separated which keeps them tangle free when carried with terminal tackle. Each model can be locked into on-board position or removed by use of a single hitch pin.
